SAFETY PROGRAM

ZENNI®

ZENNI BUSINESS

ZENNI OPTICAL PIONEERED THE INDUSTRY IN 2003 WITH A MISSION TO MAKE “EYEWEAR FOR EVERYONE.”

Now, Zenni Business offers a comprehensive employee eyewear plan without the hurdles of traditional eyewear benefits. We ensure smooth fulfillment of your employees' eyewear needs with a vertically integrated business model, including ownership of optical labs, manufacturing, logistics, design, technology and customer service.

Zenni's eye care industry experts can help streamline your workforce's access to eyewear.

TRANSFORMING WORKPLACE VISION SAFETY & COMPLIANCE

Easy ordering and affordable glasses that ensure regulatory compliance and employee satisfaction.

THE ZENNI SAFETY EYEWEAR DIFFERENCE

Affordable Eyewear For All Employees

With frames starting at \$6.95, employees can immediately access over 3,000 affordable, high-quality eyewear options, maximizing the value of their benefits at home and in the office.

Tailored Protection

Customize frames with prescriptions, blue-light blocking, anti-fog, and impact-resistant lenses for comprehensive eye safety.

Transparency & Trackability

Eliminate paper vouchers with our easy-to-use online portal, offering 24/7 access for hassle-free safety eyewear selection and order tracking anytime, anywhere.

LEVERAGE ZENNI'S INDUSTRY EXPERTISE

Effortless Admin

Streamline paperwork, ensure accurate record-keeping, and enjoy 24/7 access for efficient management.

Seamless Employee Onboarding

Intuitive interface allows real-time processing and effortless tracking & reporting for compliance control.

Eyewear Industry Leader

Get the best fit for your employees' eyewear needs while maintaining safety standards.

REVOLUTIONIZE THE FUTURE OF VISION BENEFITS

Workplace Safety Program

ANSI Z87.1 certified safety glasses are stylish, affordable, and ensure compliance and comfort.

Bespoke E-Commerce Portal

Effortless onboarding and redemption ensure simple use for employers and employees.

Maximize Benefits

Enhance your benefits package to boost employee recruitment and retention.

Corporate Benefits Program

Comprehensive plans provide high-quality eyewear for every employee, every budget.

Operational Excellence

50M+ orders fulfilled with award-winning 24/7 support, ensuring trustworthy logistics.

Eyecare Leader

#1 global online eyewear leader offering top-quality frames and lenses from optical experts.

WORKPLACE VISION SAFETY FACTS

2 out of 3

employees need vision correction.

90%

of work injuries could be avoided.

\$26,500

average worker's compensation cost for an eye injury claim.

EXPERIENCE CLEARER VISION WITH ZENNI

At Zenni, we understand the importance of clear, comfortable vision. That's why we offer a range of lenses and lens coatings to suit individual needs and various workplaces. Rest assured knowing that your Zenni lenses will provide unparalleled clarity and protection.

LENS OPTIONS

Prescription Lenses

Our general use clear lenses are available in various indexes (thicknesses) for ultimate comfort and convenience. They come with 100% UV protection and are comparable to the top optical lenses on the market.

- **Single Vision** - Standard prescription lenses for either nearsightedness or farsightedness
- **Progressives** - No-line multifocal lenses with up to three viewing areas for near, mid, and distance in one pair

Trivex® Impact Resistant

Protection meets superior clarity. 60x higher impact resistance than the FDA minimum standard for glasses lenses. 50% higher clarity than traditional impact-resistant polycarbonate lenses.

Transitions® Drivewear® Adaptive Tint Sunglasses

Sunglasses that reduce glare and adapt to changing light while inside your vehicle or working outdoors. Protect your employees on the road against rapidly changing daytime light conditions and reflective glare in any weather conditions.

Blokz® Blue Light Blocking

Zenni's exclusive line of blue light blocking lenses protect your eyes and promote better sleep, empowering you to work, play, and feel at your best.

- **Blokz® Standard** - Filters 16x more blue light protection than a regular clear lens
- **Blokz® Sunglasses** - Extra blue light protection in our darkest sunglasses lens
- **Blokz® Trivex®** - Blue light blocking in an ultra lightweight lens with impact resistance

ANSI Z87.1 Certified Safety Glasses

Our OSHA-compliant safety glasses protect the eyes for use in commercial, construction, engineering and industrial work environments. Safety protective lens packages include impact resistant lens options (high-index and Trivex®), 100% UV protection, anti-scratch coating, and water-resistant Super Hydrophobic anti-reflective coating.

Transitions® Gen S™

Seamless transitions between indoor and outdoor environments, providing comfort and protection without skipping a beat.

LENS COATINGS

Lens coatings are a special film applied to glasses lenses in order to enhance optical performance and solve issues that can impact the visual experience, especially in various workplace settings where glasses need to be resilient or are exposed to the elements.

Standard Anti-Reflective Coating

Reduce glare, reflections, and halos around lights. Particularly beneficial for nighttime vision and improving the appearance of your glasses.

Oil-Resistant Coating

Our oleophobic coating repels fingerprints and has all the properties of the standard anti-reflective and water-resistant coatings.

Water-Resistant Coating

Our super-hydrophobic coating incorporates water-resistant properties, reducing dirt and water buildup on your lenses and aiding cleaning.

Anti-Fog + Anti-Reflective Coating

This specialized coating keeps glasses fog-free when used with a unique activator lens cloth. Great for use with masks or in cold environments.

All safety glasses listed undergo rigorous testing to comply with ANSI Z87.1 standards for industrial applications.

How to read measurements (in millimeters):

ex. 50 Lens Width - 21 Bridge - 145 Temple Length

*Lens packages do not include frame cost.

HOW TO MEASURE GLASSES SIZE

When buying glasses online, you want to make sure you find frames that will fit you just right. Luckily, it's really easy to find your perfect frame measurements.

FIND YOUR FRAME DIMENSIONS

Grab a pair of glasses that fits you just right to find your perfect measurements.

Your glasses might have numbers on the inside of the temple arm. These refer to the lens width, bridge width, and temple arm length.

The most important measurement, frame width, will not be printed on the temple arm. You can measure it yourself using the guide below.

Frame width

Measure horizontally across the frame from hinge to hinge.

Lens height

Measure the lens vertically at its tallest point. If you have bifocals or progressives, this should be at least 30 mm.

Bridge

Measure the distance from lens to lens at the closest point. For the bridge, stick to a range of 2 mm less or more than the measurement.

Temple arm

Measure from the hinge to the bend, and then from the bend to the end of the arm. Add the two measurements together for the total temple arm length.

Lens width

Measure the lens horizontally at its widest point.

Perfect fit

Your frames will fit great if you stay within a range of 2-3 mm less or more from the total measurement.
